

Appraising:

The Appraisal Division consists of the Commercial/Residential and the Revaluation Sections. The Commercial/Residential Section maintains value information for all real property records and works closely with the various permitting offices in obtaining information regarding improvements to property. The Revaluation Section works to gather and analyze information regarding cost, income/expense, sales, and market data in order to complete the County-wide revaluation of real property. For more information on either of these sections, please access the corresponding link to the left.
